

BIOFOAM®

IT DOESN'T GET MUCH GREENER THAN THIS!

Synprodo
by BEWI

FULLY COMPOSTABLE

BioFoam® consists of biopolymers produced from organic materials. It is the first biological foam material in the world to receive the cradle-to-cradle certificate. In accordance with the cradle-to-cradle principle, BioFoam® products can be recycled indefinitely without loss of quality.

INSULATES AND PROTECTS

BioFoam® has excellent insulating properties, is not susceptible to humidity and is rot-free, mildew-resistant and resistant to UV radiation. Next to that it has a high capacity for shock absorption. Because of this it performs best (just like EPS) at drop-tests.

WIDE RANGE OF OPTIONS

With properties similar to EPS, BioFoam® is an excellent material for protection and insulation. BioFoam® is used in both moulded parts and (contour-)cut products. This results in a wide range of technical products and packaging solutions with an unprecedented range of form.

REDUCED CO₂ EMISSIONS

The production of BioFoam® results in a further reduction of CO₂ emissions. Although the energy requirements for the production of traditional EPS are the lowest of all plastics, the total CO₂ emission is drastically reduced even further in the production of BioFoam®.

INNOVATION THROUGH COLLABORATION, THAT IS WHAT SYNPRODO STANDS FOR.

Synprodo
by BEWI

THE SKY IS THE LIMIT

We produce our own raw materials; we work with our customers and suppliers to design suitable applications. Synprodo eagerly accepts any challenge - together we can do more. We want to inspire our clients to think of new ideas and solutions. We like to invest in research & development. With over 65 years of experience, we continue to surprise our clients with innovative solutions.

In addition to our professional R&D departments, our state-of-the-art design facilities and ultra-modern machinery ensures that we can translate almost any wish into a perfectly matched product. We apply the most exacting quality standards to this process, as you may expect from a supplier of our calibre.

INTERNATIONAL CONNECTIONS

Synprodo has formed part of the BEWI Group since 2018, one of the leading suppliers in the field of packaging, components and insulation solutions. The head office of the holding is located in Solna, Sweden, but the BEWI Group is active in almost 80 locations within Europe and has over 3.900 employees. Approximately 125 of these employees work at Synprodo in Wijchen and approximately 50 at Synprodo Besto in Zwartsluis.

OUR DEDICATION TO A CIRCULAR ECONOMY

The group-wide commitment to sustainability is integrated throughout the chain: from the production of raw materials and end products to the recycling of used products. Guided by the BEWI vision to protect people and property for a better everyday life, we take responsibility and adapt our business to the expectations of tomorrow. This is how we lead the change towards a circular economy.

OUR SUSTAINABILITY PROMISES

We recognize the urgency of corporate sustainability for improving the social, economic and environmental well-being of the community. We are already well on our way to giving substance to this, but we would like to increase the pace further. Together with our holding company, the BEWI Group, we have elaborated our sustainability ambitions in a strategic plan with clearly defined objectives for 2030.
